playposit by WeVideo | for higher ed

PlayPosit is a cloud-based interactive video design studio that lets educators build engaging instructional content quicky and intuitively. With PlayPosit, it's never been easier to introduce discussion-based, video-centric learning to any environment. See how we compare with other tools below.

	H5P	playposit by WeVideo
User Management and Integrations:		
FERPA compliant	✓	✓
Google Docs-style collaboration: real-time or asynchronous	✓	✓
Manage students, groups, and assignments	✓	✓
Integrations with Learning Management Systems (LMS)	✓	✓
Admin ability to review student submissions in LMS and platform	✗*	✓
**Need plug-in/based on LMS only*		
Interactive Questions and Lessons:		
Add questions to YouTube videos	✓	✓
Ask closed-ended questions during a video	✓	✓
Ask open-ended questions during a video	✓	✓
Add interactive discussion forums	✗	✓
Add branched learning questions to a video	✓	✓
Analyze interactive question response data	✓	✓
Create interactive lesson playlists	✗	✓
Embed PDFs and website URLs to interactive questions	✗*	✓
Add AI-generated interactive questions	✓	✓
**Can add interactive slides as an activity and website links as videos, but not embedded into content like with PlayPosit.*		
Other Noteworthy Features:		
Extensive live customer support and resources	✗*	✓
Hosting & media library capabilities	✓**	✓ *Coming soon!*
Collaboration	✓	✓
Peer review	✗	✓ *Coming soon!*
**Knowledge base and discussion forum, but limited opportunities for live support.*		
***You can upload content for use for H5P; however, the process is more complex.*
